

2026 Gene Forum

The 25th Annual International

Top scientists from
around the world

See more at www.geneforum.ee

We invite you to the
25th International Gene Forum on **August 25–26, 2026**
at the Estonian National Museum in Tartu, Estonia.

Gene Forum is the leading scientific conference on genetics and genomics,
the flagship scientific conference in the Baltic region.

This year's conference marks the **25th anniversary of Gene Forum**

Programme

Anniversary programme led by the founder of Estonian Biobank Professor Andres Metspalu, **will focus on healthcare genomics** by exploring long-term strategic priorities, collaborative initiatives, diverse national approaches, and advanced applications for disease risk prediction.

Keynote speakers:

- ▶ Marco Marcella, DG SANTE and
- ▶ Sir Peter Donnelly, Genomics Ltd., University of Oxford

The **2nd day** of the conference **will feature 4 scientific sessions** with renowned keynote speakers:

- ▶ Human genome complexity (**Keynote: Evan Eichler, University of Washington**)
- ▶ Single-cell genomics (**Keynote: Nicole Soranzo, Human Technopole**)
- ▶ Microbiome (**Keynote: Molly Przeworski, Columbia University**)
- ▶ Population genomics (**Keynote: Rob Knight, Rady Children's Director, Center for**

Microbiome Innovation)

Submit your poster and claim a talk!

Submit a poster presentation to the GeneForum 2026 apply for the opportunity to present your work on stage alongside invited speakers with a **7-minute talk**.
